Final-year Computer Science student with strong skills in C, HTML/CSS, and JavaScript. Quick learner and problem solver.

Experience

KodNest Technologies

Feb 2026 - May 2026

Java Full Stack Developer Intern

Bangalore, Karnataka

Learning and developing full-stack applications using Java, JDBC, Servlets, and SQL.

Education

Sharnbasva University

Nov 2022 – Aug 2026

Bachelor of Technology in Computer Science (CGPA: 8.0)

Kalaburagi, Karnataka

Projects

Weather App | *React.js, JavaScript, HTML, CSS, OpenWeather API, Node.js*

Jan 2024

- Developed an interactive weather application using React.js and JavaScript to provide real-time weather updates through the OpenWeather API.
- Designed a responsive and visually appealing user interface using HTML and CSS with smooth UI interactions and animations.
- Implemented component-based architecture and API integration to enhance application performance and user experience.
- Managed project dependencies using Node.js and npm while strengthening frontend development and API integration skills.

Decentralized Organ Donation Platform | *Python, SQLite, MySQL*

Aug 2024

- Built a decentralized organ donation platform to securely manage donor and recipient registration details using Python and database technologies.
- Implemented compatibility-based matching logic to simplify the organ allocation process and improve system efficiency.
- Designed database management features using SQLite/MySQL for secure storage and efficient retrieval of user information.
- Applied modular programming practices to maintain a clean code structure and improve application scalability.

Agri Medha – Smart Crop Advisory | *Java, React.js, JavaScript, HTML, CSS, MySQL*

Jun 2026

- Developed a smart crop advisory platform that provides farmers with data-driven crop recommendations based on soil, weather, and environmental parameters.
- Implemented the core application logic using Java to process agricultural data and generate suitable crop recommendations.
- Designed a responsive and user-friendly frontend using React.js, JavaScript, HTML, and CSS for seamless farmer interaction.
- Integrated MySQL for efficient storage and management of user, soil, crop, and advisory-related data.
- Developed an interactive advisory workflow to help farmers make informed decisions regarding crop selection and sustainable farming practices.

Technical Skills

Languages: Java, C, JavaScript, HTML/CSS

Frameworks/Libraries: React.js, Next.js, Node.js, Spring Boot

Databases: MySQL, SQLite

APIs: OpenWeather API, REST APIs

Developer Tools: VS Code, Cursor, Node.js, npm

Version Control: Git, GitHub

Declaration

I hereby declare that the above-mentioned information is true and correct to the best of my knowledge.
